

# Is Homework Necessary?

By Kamile

I am writing to Ms.Doherty and I strongly believe that I can persuade you that homework is not necessary because we already spent five hours and fifty minutes at school doing work. Homework is just a waste of time all you do is sit there, get bad posture, you get unfit and you can get stressed during the process.

Firstly, if you already spent so much time at school, I don't think you need more work. And you don't need to spend more time at home doing more school work. You may think that we will learn more but no, school is where you learn new things and home is where you can have fun, help your parents, go somewhere and more.

Secondly, everyday our teacher sits at his desk and corrects our work, if you had to just sit there and correct 216 copies a week how would you feel? Well maybe if you tried doing it you might, just might feel how we feel just sitting there, sad faces 😞and bad posture.

Thirdly, if it's nice outside you can't go outside and play or if you have after school activities you have to rush your homework so you can finish it in time. Or if you have a smaller brother or sister they will try to get your attention. So it is very hard to do your homework. A lot of kids don't like homework so that is another reason there

In conclusion, I think that homework should be gone from this school because in my opinion I think it is a waste of time and you don't get much free time so you can't go outside and have fun. If you can't have fun so you won't get fit. All kids need fun and homework gets rid of that time.

So if you are reading this  
Ms.Doherty please get rid  
of homework

'Thank you'
