

# VIKINGS

(by Ethan & Ava)

Hello and welcome to our presentation about Vikings! - Ethan

## THINGS WE LEARNED

Viking men always had their weapon beside them even when they were asleep! Vikings didn't speak English at all they only spoke Norse. Also Vikings never wore horned helmets. Vikings ate meat, fowl, fish, vegetables, bread and fruit now imagine eating all of that in one meal!!!! In 796AD Vikings raided Ireland and took over, some of them left while some settled down there. Vikings also often came from Sweden, Denmark and Norway - Ava

## VIKING LONG SHIPS

Vikings travelled to different countries using long ships. Viking long ships are clinker-built and are made of wood they have a dragon/monster at the front of the ship to scare people when they raid. On the side of the ship there are shields used to protect them from enemy fire. -Ethan

## ARMOUR

Vikings wore chain mail armour and iron helmets, they used axes, swords and spears to fight in wars or duels. Iron was hard to dig out of the ground then so only rich people got pure iron swords and armour. -Ava

## FOOD

Vikings ate a lot of food before such as meat, fowl (a fat bird), vegetables, fruit and bread like I said before at the start. Vikings drank ale (beer), water or wine from animal horns. -Ethan

## *Fin*

Thank you for listening to our presentation and we hope you enjoyed it **HORRAHHH.** – Both
