

# Is Homework Necessary?

By Aliyah

I am writing to Ms Doherty the principal of CSCNS. I believe that homework is not necessary because it causes you to not play with your siblings, go outside and enjoy the fresh air. Also teacher have to correct homework from Monday to Thursday. When you come home homework is the first thing you have to do.

Firstly, When you come home you will have to do homework and if your sibling comes over to you and asks if you could play with them you would sadly have to disappoint them and say no but deep down you really want to play with them.

Secondly, you don't get to play outside with your friends because of all of you homework you have to do. Sometimes you spend more the 1 hour doing your homework. In addition homework is the most hated thing in school, most of the population in schools it shows that homework is the worst subject in school. In addition to that schools that don't give homework to their student actually do better on their tests.

Thirdly, teachers have to waste their time to correct the children's homework instead of relaxing and playing with their pets (like Mr Kinsella). If you have a pet and the pet is hungry you would not have time.

Furthermore, you have homework from Monday to Thursday none stop. I would like if homework wasn't in schoolssas (primary schools). Homework isn't that fun maybe if we were to have homework it would be like games that help you learn or colouring pages.

In conclusion, I think that homework is a big waste of time and that primary school should not have homework. Ms Doherty I please ask

you to consider my persuasive text in the policy. It's my best persuasive writing ever (this is my first one).

Ms Doherty if you  
are reading this
