

## Is Homework Necessary by Demi Finn

I strongly believe that homework is not necessary so I'm going to persuade you. So here is my persuasive piece so you spend less time with your family and if you want to have a family meeting but you have to do your homework it's a waste of time, and if you have to babysit a younger sibling but you can't that is the first reason and now I'm going to give you another one.

Secondly it's too much normally it is five hours for me to do it but sometimes if you're stuck it will probably it takes more time if you are stuck or if you do get it probably takes ten or five minutes to do it that's why I think we should have less homework and if you have chores but you can't do them to get your pocket money but our principal Ms Doherty I'm sure you have a different opinion to everyone else that we should have homework to you .

Thirdly I think other people have different opinions to each other and how homework should be and other people have to do different then you get less homework because it is difficult for you but I am not going to be harsh on you cause I find it difficult to .

THANK YOU I HOPE YOU ENJOYED IT
