

IS HOMEWORK NECESSARY

By Xinyan

I think homework is necessary, because homework can help you to remember everything you already learn in the school. Also homework can give great scores.

Firstly, homework is not a waste of time, if you think homework is a waste of time, that's because you are thinking about playing on the laptop or something else when you are working on your homework.

Secondly, home can help you get a good score on test in school.

Lastly, homework can help you to get good at something. If you are not good at maths, so you can use maths homework to review you maths. That's why I am so good at maths.

I strongly believe some children think homework is not necessary. I know you want get lot of time to play with your family. But if you don't do your homework you are not going to learn anything.

As you can see homework is good for you.

The end

Thank you for listening, I hope nobody was playing when I was talking.
